how do we get people into rouses point, as a destination, not a bypass?

using the old train station, the amtrak station, and the customs house to develop a cohesive design to welcome.people.into.rouses.point.

renovation and rehabilitation of the historic railway station to function as a museum and office space for the historical society.

the site would also extend across the rail-road tracks for potential development of the area.

new features of the proposed site are including by not limited to: a museum, historical society office, ticket office, baggage and locker storage, bicycle rental, patio space for relaxing and eating, and an information kiosk about the town and all it offers for visitors and residents.
